RESTAURANT WEBSITE - PATOLA CAFE

Mission:
- To display the restaurant's selection of dishes
- To showcase the restaurant's signature attractions
- To give potential customers a preview of the restaurant

Measure of site's success:

- If the website can adequately and effectively present the restaurant contents and ideas

Description of target audience

Foodies - people who want to experience something new and refreshing food paraphernalia

Tourists - the restaurant is also an attraction for tourists who wants to experience the country's finest dishes
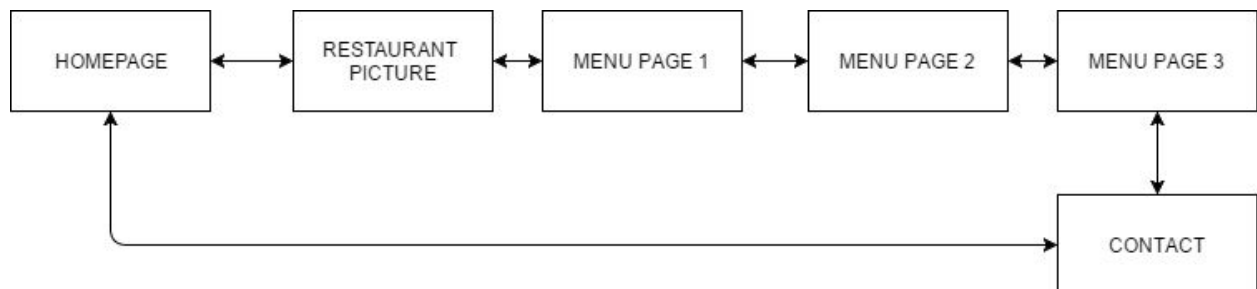

How to assess user satisfaction
- Through user comments and criticisms from the Contact section details.

Informational Structure

Type of navigation: Linear / Mixed

Site Flowchart

Flowchart Explanation:

The aim of the website is to display its selection to give the users an idea of the restaurant content. If the restaurant wants to maximize their profit, it is evident that they should display all possible products that they could sell for better chances that something may suit the customer's fancy.

The group thinks that a linear structure is best suited for the website's mission statements.
